About Ourselves

We are a renowned firm of chemical engineers and project consultants based at Chennai, India and Singapore, with over 15 years of experience serving the Chemical Industry with market research and consulting services

We maintain an extensive database tracking demand and supply scenario, technology changes, price movements, collaborations, licensors of technology, new projects, mergers and acquisitions and other general industry trends in Indian and global chemical industry

We provide highly reliable and quick information on above mentioned aspects to enable our clients to take quick and informed management decisions.

We bring out research publications on a periodic basis on topics of interest to companies looking for investment opportunities

With in-house data and experienced chemical engineers and technologists, NANDINI provides advice on chemical project opportunities, taking into account factors such as the proposed site, investment levels and expertise of the entrepreneurs

Our staff consists of Analysts who are Chemical Engineers and Post Graduates in Chemistry, Field Market Survey Personnel and Database Managers

Market Research and Consultancy Services

We provide multiclient Product Profile reports as well as Customised Product/Technology reports.

EVERGREEN Product Profile Reports

Multiclient report that enables you to gain a quick overview of markets, players, new projects, technology trends. We continuously track 600+ chemicals enabling a quick turnaround and at effective costs

Single client Product Market Research

We provide customized product reports/technology reports, tailored to your specific needs. More detailed than Multi-client reports with expanded scope. We undertake global/ regional studies using primary as well as secondary research

International Advisory Services

We undertake feasibility studies, market studies, technology assessments, and advise on investment opportunities.

NANDINI Chemical Journal

We publish a monthly journal analyzing global industry trends with deeper insight into Indian chemical industry
